

Policy

Holcim Environmental Policy

Policy Statement

Our commitment is to continuously improve our environmental performance and provide positive contributions to our business. Holcim is committed to sustainable development that meets the needs of the present without compromising the ability of future generations to meet their own needs. This commitment is part of our mission statement and is further evidenced by our membership of the World Business Council for Sustainable Development. The present environmental policy, its principles, directives and recommendations support this commitment. Each Group company is to elaborate an own environmental policy that fully integrates the principles of the present corporate policy.

Policy Principles

There are four main pillars of our Environmental Policy, for which we have assigned principles to guide our progress.

1. Management Systems

We apply environmental management guidelines and standards worldwide and monitor our performance. We promote our commitment through training and integration into business processes.

2. Resources Utilization

We promote eco-efficiency, conservation of non-renewable natural resources and recycling of secondary materials. We invest in the development of innovative and sustainable products and processes.

3. Environmental Impacts

We measure our performance, continuously improve and promote best practice in our industry.

4. Stakeholder Relations

We engage our stakeholders and report publicly on compliance, performance and progress.
