Holcim acquires Besblock Ltd in the UK

Holcim acquires Besblock Ltd, a leading supplier of precast materials to the UK Midlands construction industry. The Besblock technology platform is dedicated to the production of sustainable building blocks, with a capacity of around 2.5 million m² blocks per year. Its products include the industry-leading “Star Performer,” a sustainable and multi-purpose on-site solution that uses recycled aggregates and 24% less material than a solid block. Besblock leads the industry in sustainability, with one of the most efficient truck fleets in the country as well as a new 1.6 megawatt biomass boiler and renewable energy system.

Miljan Gutovic, Region Head Europe: “The acquisition of Besblock Ltd is an important step toward becoming the UK’s leading supplier of innovative and sustainable building solutions. With its product range and strong sustainability profile, we’re delighted to combine forces with this progressive and market-leading business. I look forward to welcoming all Besblock employees into the Holcim family and investing in our next era of growth together.”

Besblock Ltd was founded in 1972, with two manufacturing facilities based in Telford (West Midlands). As a leader in sustainability, Besblock has focused on deploying renewable energy within its manufacturing processes and invested significantly in green technologies in recent years.

About Holcim

Holcim is a global leader in innovative and sustainable building solutions with net sales of CHF 29.2 billion in 2022. Driven by its purpose to build progress for people and the planet, its 60,000 employees are on a mission to decarbonize building, while improving living standards for all. The company empowers its customers across all regions to build better with less, with its broad range of low-carbon and circular solutions, from ECOPact to ECOPlanet. With its innovative systems, from Elevate roofing to PRB’s insulation, Holcim makes buildings more sustainable in use, driving energy efficiency and green retrofitting. With sustainability at the core of its strategy, Holcim is becoming a net-zero company with 1.5°C targets validated by the Science Based Targets initiative (SBTi).
